Washington, DC 20554

Re: *Applications of Cricket License Company LLC, et al., Leap Wireless International, Inc., and AT&T Inc. for Consent to Transfer Control of Authorizations*, WT Docket No. 13-193
REDACTED - FOR PUBLIC INSPECTION

Dear Ms. Dortch:

In response to a request from Commission Staff, AT&T Inc. (“AT&T”) and Leap Wireless International, Inc. (“Leap”) (collectively, the “Applicants”) are submitting additional information in support of the applications for transfer of control of wireless licenses held by Leap and its subsidiaries to AT&T (“Applications”). The supplemental information falls into the following categories: (1) the plans for the post-closing migration of Leap customers to AT&T’s network; (2) the contingent value right arrangement relating to Leap’s Lower 700 MHz A Block license in Chicago (the “Chicago License”); (3) Leap’s current network deployment; (4) AT&T’s plans for deploying the Leap spectrum; (5) the Aio Wireless (“Aio”) brand launch; and (6) the economic analysis of the competitive effects and public interest benefits of the proposed transaction. We also are submitting a revised spectrum aggregation chart, enclosed as Exhibit 1 to this letter.¹

¹ On June 21, 2013, Leap filed an application to assign the license WQIW744 to Cellular South d/b/a C Spire. See ULS File No. 0005824968 (filed June 21, 2013). The Commission granted consent to that assignment on August 9, 2013. The parties will file an amendment to remove WQIW744 from the Applications after the closing of the sale of that license.

I. Plans for Post-Closing Migration of Leap Customers

As noted in the previously filed Description of Transaction, Public Interest Showing and Related Demonstrations (“Public Interest Statement”)² and the Declaration of William Hogg, appended thereto, AT&T’s integration plans at this time are preliminary and, as such, any current plans remain subject to change.³ Having said that, AT&T currently expects to complete the migration of Leap customers to AT&T’s network within 18 months of the transaction’s closing.⁴ The migration will provide Leap customers with access to AT&T’s nationwide network footprint, superior choice in handsets, more robust data services, and Wi-Fi hotspots across the country.⁵

After merger close, AT&T will continue to offer all customers, including migrating Leap customers, competitive rate plans that appeal to value-conscious customers, including the option of choosing low-cost devices and low-cost services.⁶ In addition, AT&T will honor the existing plan of each Leap customer as of merger close, provided that the customer does not suspend or terminate his or her service for that plan, or choose to upgrade to a device or plan that is not comparable to his or her current device or plan.

As also noted in the Public Interest Statement, after the transaction’s close, AT&T intends to combine the nascent operations of Aio with Leap’s existing operations under the Cricket brand name.⁷ In that process, there will be many opportunities for Leap customers to migrate to AT&T’s network organically. First and foremost, AT&T believes that Leap customers will find AT&T’s device and rate plans attractive and will choose to migrate on their own initiative. In fact, it is AT&T’s experience (and indeed, the experience of the industry) that prepaid subscribers typically upgrade their devices frequently.⁸ Thus, AT&T expects that many Leap customers can be seamlessly migrated to AT&T’s network as they select their new devices. Finally, as AT&T learns more about Leap’s customer base, it may formulate offers designed to

² Description of Transaction, Public Interest Showing, and Related Demonstrations (filed Aug. 1, 2013) (“Public Interest Statement”).

³ Public Interest Statement at 15-17; Declaration of William Hogg, Senior Vice President, Network Planning and Engineering, AT&T Services Inc., ¶¶ 8-10 (Aug. 1, 2013) (“Hogg Declaration”).

⁴ Public Interest Statement at 16.

⁵ *Id.* at 9.

⁶ *Id.*

⁷ *Id.* at 8.

⁸ See, e.g., *Applications of Deutsche Telekom AG, T-Mobile USA, Inc., and MetroPCS Communications, Inc.*, WT Dkt No. 12-301, Description of Transaction, Public Interest Showing and Related Demonstrations at 21 (filed Oct. 18, 2012) (“Because 60-65 percent of MetroPCS’ customer base upgrades its handset each year, MetroPCS expects most of its customers to have migrated to the T-Mobile USA network within the first year after the transaction closes.”).

further encourage Leap customers to migrate to AT&T's network within 18 months of merger close.

Upon migration to the AT&T network, Leap customers will enjoy a superior array of devices, including the iPhone 5, the Samsung Galaxy Express, the Nokia Lumia 620, and other smartphones and feature phones. A preliminary list of devices that AT&T currently expects to offer to Leap customers is attached hereto as Exhibit 2. In addition, migrating Leap customers will have the opportunity to take advantage of the "bring your own device" option that will allow them to use any unlocked and technically compatible phone on AT&T's nationwide network. Migrating Leap customers may also choose to upgrade devices and/or service and adopt a new rate plan from AT&T's full portfolio of services, including postpaid services.

We note that Leap recently announced extended third-party financing programs allowing customers to finance their devices through a payment plan offered and managed by a third party. Just as Leap is not a party today to such financing arrangements, post-closing AT&T will not be a party to those financing agreements, and the terms and conditions of those agreements will remain between the third party and the customer. After the transaction's close, Leap customers will continue to have in-store access to attractive third-party financing opportunities.

II. The Contingent Value Right Arrangement for the Lower 700 MHz A Block License

The stockholders' representative, Laser, Inc., is currently a wholly-owned indirect subsidiary of Leap.⁹ At the time of the AT&T/Leap merger, the equity of the stockholders' representative will pass from Leap in equal proportions to three individuals who currently are Leap directors – S. Douglas Hutcheson, John D. Harkey, Jr., and Mark H. Rachesky, M.D., or their successors.¹⁰ At no time will AT&T have any interest in the stockholders' representative.

The stockholders' representative will be responsible for maintaining the Chicago License and taking such actions as shall be advisable to eliminate interference to the Chicago License from other frequencies in a reasonable manner.¹¹ AT&T is required to provide reasonable assistance to the stockholders' representative in this regard,¹² but AT&T is otherwise prohibited from performing any services related to the telecommunications activities of the Chicago License.¹³

⁹ Leap Wireless International, Inc., Current Report (Form 8-K), Exhibit 2.1, Merger Agreement § 5.1(v), at 38-39 (July 15, 2013) ("Merger Agreement").

¹⁰ Laser, Inc., FCC Form 602, File No. 0005880347 (filed Aug. 1, 2013).

¹¹ Merger Agreement at Exhibit B, Contingent Value Rights Agreement § 2.1(a), at 5-6.

¹² *Id.*

¹³ *Id.* § 2.1(b), at 6.

The stockholders' representative will have sole discretion as to whether and when to enter into an agreement to sell the Chicago License, subject to any regulatory requirements.¹⁴ The stockholders' representative will keep AT&T reasonably informed about the sales process and accept any AT&T comments on the sale agreement to the extent they are for the purpose of eliminating post-closing liabilities, as well as consider other reasonable comments in good faith.¹⁵

If the stockholders' representative fails to enter into an agreement to sell the Chicago License within two years after the closing of the AT&T/Leap transaction, then most provisions of the Contingent Value Rights Agreement terminate (including the provisions described in the foregoing two paragraphs),¹⁶ and AT&T may take such actions to dispose of the Chicago License as AT&T shall determine in its sole discretion, but even in that event, the net proceeds would go to the former Leap shareholders.¹⁷

III. Leap's Current Network Deployment

As noted in the Public Interest Statement, Leap currently utilizes approximately 42 percent of its total AWS and PCS spectrum within its network footprint to provide 3G CDMA EVDO and, in limited areas, LTE service.¹⁸ Leap currently uses approximately [Begin Leap Confidential Information] [End Leap Confidential Information] percent of its PCS spectrum and approximately [Begin Leap Confidential Information] [End Leap Confidential Information] percent of its AWS spectrum.

Leap has deployed LTE technology in only 11 metropolitan areas, and has done so largely in narrow-bandwidth 3x3 MHz configurations, with no deployments larger than 5x5 MHz.¹⁹ The attached Exhibit 3 identifies the 11 metropolitan areas where Leap has deployed LTE, as well as the deployment configurations for each area. Leap's current network includes approximately 9,700 cell sites, a few thousand of which AT&T preliminarily estimates it can integrate productively into AT&T's network.²⁰

¹⁴ *Id.* § 3.1(a), at 6.

¹⁵ *Id.* § 3.1(b), at 6.

¹⁶ *Id.* § 8.8, at 19.

¹⁷ *Id.* § 3.2(a), at 7-8.

¹⁸ The Public Interest Statement indicates that Leap is using approximately 42 percent of its spectrum, which was based on calculations performed in June 2013. Public Interest Statement at 14 n.54. The spectrum utilization percentages presented are calculated on a MHz-POPs basis. Leap's network deployment changes from time to time, and therefore these utilization percentages may change over time, as well.

¹⁹ *Id.* at 11.

²⁰ *Id.* at 17.

IV. AT&T's Plans for Deploying the Leap Spectrum

As noted in the Public Interest Statement, AT&T preliminarily has determined that it will be able to deploy Leap's unused, contiguous AWS spectrum in as little as 60-90 days in areas where AT&T currently anticipates it already will be utilizing AWS spectrum for LTE at the time of closing, and that it will be able to deploy unused, contiguous Leap spectrum to expand LTE capacity in many additional areas within 12 months after the close of this transaction.²¹ The enclosed Exhibits 4 and 5 list the CMAs that fall into these two deployment categories.²²

The Applicants also stated in the Public Interest Statement that the addition of the Leap spectrum will allow AT&T to deploy LTE services in larger, contiguous 10x10 MHz (or greater) blocks of spectrum. The enclosed Exhibit 6 lists the CMAs where, in at least one county within the CMA, AT&T currently holds less than 20 MHz of contiguous AWS spectrum, and the addition of the Leap spectrum will give AT&T 20 MHz or more of contiguous AWS spectrum – thus permitting AT&T to move from a 5x5 MHz AWS deployment to a contiguous 10x10 MHz or greater AWS deployment.

As discussed in the Declaration of William Hogg, AT&T is in the process of deploying PCS spectrum for LTE service, and AT&T expects to roll out LTE service on PCS spectrum by the end of this year in, among other cities, Washington, D.C., Baltimore, Dallas, Philadelphia, New York City and San Francisco.²³ Exhibit 7 identifies these and additional representative CMAs where AT&T preliminarily plans to deploy PCS spectrum for LTE service by the end of this year.²⁴

²¹ *Id.* at 15. Based on further review of the documents received from Leap, AT&T notes that several of the cities Mr. Hogg identified in his declaration (*i.e.*, Chicago, Washington, D.C., and Milwaukee) as having unused, contiguous spectrum actually are partially using spectrum that AT&T preliminarily expects it will be able to redeploy for LTE service within 12 months. *See id.*; Hogg Declaration ¶ 8. In these cities and just a few others identified in Exhibit 5, AT&T expects that it will be able to migrate Leap customers to its network and redeploy the partially-used spectrum for LTE service within the 12 month period.

²² The exhibits contain a preliminary list of CMAs based on AT&T's LTE deployment plans as of the date of the filing of the Public Interest Statement (August 1). AT&T's LTE deployment plans are regularly updated and refined as additional information becomes available to the company and, depending upon the length of time before closing, may change.

²³ Hogg Declaration ¶ 6.

²⁴ The exhibit contains a preliminary list of CMAs based on AT&T's current LTE deployment plans. As noted above, AT&T's LTE deployment plans are regularly updated and refined as additional information becomes available, so it is possible that the CMAs where AT&T actually will deploy PCS by the end of the year may change.

V. The Aio Brand Launch

As discussed in the Declaration of Rick L. Moore, which was appended to the Public Interest Statement, AT&T recently launched a new brand, Aio, to appeal to a broader set of customers.²⁵ Aio launched initially in three metro areas (Houston, Orlando and Tampa) and as of the date of this letter has since added six additional Florida markets (Jacksonville, Gainesville, Ft. Myers, Naples, Miami-Ft. Lauderdale, and West Palm Beach) and two additional Texas markets (San Antonio and Austin), as well as Atlanta, Georgia.

Today, Aio still is very early in the process of developing the necessary retail distribution network, building brand recognition, and attracting a significant customer base.²⁶ Aio's current distribution network is comprised of two channels: (1) Aio-branded retail locations operated by exclusive dealers, and (2) online sales through Aio's website. As of August 13, 2013 there were 182 Aio exclusive dealer retail locations. Online sales currently are available to customers in metropolitan areas where there are, or shortly will be, Aio retail locations.

VI. Economic Analysis of the Proposed Transaction

Dr. Israel provides the following requested supplemental information pertaining to the paragraphs of his declaration, which was appended to the Public Interest Statement,²⁷ listed below.

- Israel Declaration, paragraph 18: “Although AT&T is the second largest wireless provider nationally, with just under 30 percent of subscribers, Leap has less than 2 percent of all subscribers.”

Dr. Israel calculated these national share estimates of subscribers for each company as the sum of each company's estimated subscribers across all CMAs for which AT&T provided estimates, divided by the total subscribers estimated across all companies and CMAs. The estimated subscribers for each company are associated with AT&T's internal SMART Flow Share estimates for March 2013. The CMAs for which AT&T provided estimates include all CMAs in the 50 states and the District of Columbia, and five CMAs in Puerto Rico. The tab “Estimated Share of Subscribers, All CMAs and All CMAs where Leap > 2%, March, 2013” in Exhibit 8 provides this data.

- Israel Declaration, paragraph 21: “Of 721 CMAs in the U.S., Leap is present with more than two percent of subscribers in only 100 CMAs, but Leap has more than five percent

²⁵ Declaration of Rick L. Moore, Senior Vice President, Corporate Development, AT&T Inc., ¶ 10 (Aug. 1, 2013).

²⁶ *Id.*

²⁷ Declaration of Dr. Mark Israel, Executive Vice President, Compass Lexecon (Aug. 1, 2013) (“Israel Declaration”).

of subscribers in only 43 CMAs and more than ten percent of subscribers in only 14 CMAs. In all but a handful of the CMAs where Leap has a non-negligible share, consumers will continue to enjoy the benefits of competition from four national, facilities-based providers after the proposed transaction, and in some CMAs there is additional competition from a regional provider.”

The estimated shares for each company are from AT&T’s internal SMART Flow Share estimates for March 2013. The tab “Estimated Share of Subscribers, by CMA, March, 2013” in Exhibit 8 provides this data.

- Israel Declaration, paragraph 28: “Although only a small percentage of Leap subscribers that port out choose AT&T, an even smaller percentage of AT&T subscribers that port out choose Leap. The porting data show that only 3.3 percent of subscribers leaving AT&T go to Leap. This is only 45 percent of the diversion to Leap that would be predicted by Leap’s share in CMAs where Leap has at least a two percent share of subscribers. This diversion rate to Leap places Leap significantly behind Verizon, Sprint, and T-Mobile/MetroPCS among AT&T’s competitors. Thus, even in areas where Leap may have a substantial share, the fact that Leap is a tiny source of diversion from AT&T minimizes any potential competitive concerns inferred from shares alone.”

To calculate a proxy for the diversion ratio from AT&T to Leap, Dr. Israel used AT&T’s port-out data, including all local areas where AT&T’s porting data indicates at least one port-out to Leap. To calculate a proxy for diversion from Leap to AT&T, Dr. Israel used all of Leap’s port-out data, which Dr. Israel understands includes all geographic areas. For the comparison of these diversion proxies to AT&T’s and Leap’s shares, Dr. Israel used all CMAs where AT&T’s internal SMART Flow Share estimates indicate that Leap had more than two percent of subscribers in March 2013.

- Israel Declaration, paragraph 33: “Sprint offers prepaid service through several brands, most notably Virgin Mobile and Boost Mobile, and had an estimated share of prepaid subscribers over 20 percent and almost 20 percent of gross prepaid adds in the first quarter of 2013.”
- Israel Declaration, paragraph 35: “Following their recent merger, the combined T-Mobile/MetroPCS became one of the largest providers of prepaid offerings, with an estimated share of subscribers over 20 percent and an even higher share of gross prepaid adds in the first quarter of 2013.”

The estimated subscribers and gross adds are from AT&T’s internal estimates of prepaid subscribers and gross adds on a national basis as of first quarter 2013. Dr. Israel calculated shares of end-of-period subscribers and gross adds as the sum of the estimated totals given for Sprint, T-Mobile, and MetroPCS divided by the sum over all companies for which estimates were provided. Shares for T-Mobile and MetroPCS were then combined. The tab “Estimated Subs and Gross Adds, Prepaid, First Quarter, 2013” in Exhibit 8 provides this data.

- Israel Declaration, paragraph 45, note 54: “To see this, note that Leap has a small share of subscribers, just over five percent across the CMAs in which it has non-negligible share.... Providers other than AT&T and Leap have about 65 percent of subscribers in the Leap CMAs (based on internal AT&T estimates).”

Dr. Israel calculated estimated shares of subscribers for each company in areas where Leap has non-negligible share as the sum of each company’s subscribers across the CMAs for which AT&T provided estimates *and* Leap had an estimated share of more than two percent of subscribers. The estimated subscribers for each company are associated with AT&T’s internal SMART Flow Share estimates for March 2013. The CMAs for which AT&T provided estimates include all CMAs in the 50 states and Washington, D.C., and five CMAs in Puerto Rico. For subscriber totals for each company in these CMAs, see the tab “Estimated Share of Subscribers, All CMAs and All CMAs where Leap > 2%, March, 2013” in Exhibit 8. For CMAs where Leap has more than two percent of subscribers, see the tab “Estimated Share of Subscribers, by CMA, March, 2013” in Exhibit 8, which provides this data.

Pursuant to the Protective Order and Second Protective Order in this proceeding,²⁸ we are submitting the unredacted Confidential version of the Letter and the following Highly Confidential Exhibits on a DVD:

- Exhibit 2 - Preliminary List of Devices That AT&T Expects to Offer Leap Customers
- Exhibit 3 - Leap LTE Metropolitan Areas and Deployment Configurations
- Exhibit 4 - Preliminary Identification of CMAs Where AT&T Estimates It Will Be Able to Deploy Leap’s Unused, Contiguous AWS Spectrum in as Little as 60-90 Days
- Exhibit 5 - Preliminary Identification of CMAs Where AT&T Estimates It Will Be Able to Deploy Unused, Contiguous Leap Spectrum Within 12 Months
- Exhibit 7 - Representative List of CMAs Where AT&T Plans to Deploy PCS Spectrum for LTE Service By the End of the Year
- Exhibit 8 - Data Supporting the Declaration of Mark A. Israel

Exhibits 1 (Updated Spectrum Aggregation Chart) and 6 (CMAs Where in at Least One County Within the CMA AT&T Holds Less Than 20 MHz of Contiguous AWS Spectrum, and the Addition of Leap Spectrum Results in 20 MHz or More of Contiguous AWS Spectrum) contain no Confidential or Highly Confidential Information and are being submitted on the DVD. In addition, we are submitting a redacted version of this letter and its attached Exhibits in ECFS. Finally, we are submitting copies of the unredacted letter and its attached Exhibits to Commission Staff.

²⁸ Protective Order (WTB rel. Aug. 7, 2013); Second Protective Order (WTB rel. Aug. 7, 2013).

NOTES:

1) The BRS availability analysis is based upon filings in WT Docket No. 06-136 and a review of Spectrum Dashboard and ULS records. Except for the areas described in 47 C.F.R. 27.1134(a)(1), AWS is treated as available now that the "[all] 12 federal agencies have reported that they have ceased operations of their systems in the 1710-1755 MHz band, clearing the way for new commercial licensees." Sixth Annual Progress Report on the Relocation of Federal Radio Systems from the 1710-1775 MHz Spectrum Band, available at http://www.ntia.doc.gov/files/ntia/publications/sixth_annual_report_1710-1755_mhz_04042013.pdf.

2) This chart does not attribute Leap's interests in Flat Wireless or PR Wireless to the combined company because these will be divested.

3) This chart assumes consummation of the transactions referenced in the accompanying competitors chart.
